

Supervisor Evaluation Form

Name of Student Intern Barinov Kirill Alekseevich

BSc Degree Programme “Data Science and Business Analytics”
Faculty of Computer Science at HSE University

Internship Start Date: April 1 2024

Internship End Date: April 23 2024

Please provide an honest assessment of how the intern performed in each area you were able to observe.

The following assignments/ goals were communicated to the student in the course of graduation internship:

1. Apply preprocessing of spectral data
2. Apply dimensionality reduction methods
3. Select and train models using different combinations of preprocessing and dimensionality reduction methods.
4. Choose the optimal combination of the model with machine learning methods that can classify plants for health and plant type with high accuracy based on their spectral data.

The student took a responsible approach to the implementation of the pre-graduate practice. The tasks of the practice were completed in full.

The student earns a grade 9 points out of 10.

I am familiar with the internship report submitted by the intern.

April 23 2024

*Candidate of Technical Sciences,
Head of the lab C-1, IITP RAS*
